

## Learning objectives

### Part 1

- Planning effective teaching and learning
- Teaching in the clinical setting

*By the end of this session participants will have:*

#### **Planning effective teaching and learning**

- Explained reasons for developing a teaching plan.
- Written at least one SMART learning objective.
- Explained the role of learning objectives in planning and evaluating teaching episodes.
- Developed a teaching plan with a group incorporating set, body and closure.
- Discussed set-body-closure structure for teaching.
- Described strategies for setting the scene.
- Described main considerations in closure of a teaching episode.
- Identified issues which impact on teaching episodes and ways to address these at the planning stage.

#### **Teaching in the clinical setting**

- Identified limitations and difficulties faced when teaching and learning in the clinical environment and ways to address these.
- Identified a range of learning opportunities in the clinical environment.
- Examined a framework to structure teaching in the clinical environment.
