VATC is a sub-committee of the Victorian Association of Directors, a body that represents the departments of the Victorian public hospitals that employ trainees under the jurisdiction of the Department of Health, Victorian Government.

**Information regarding the Registration of Interest**

The "Registration of Interest" form is relevant to those wishing to work in accredited training positions as ANZCA Advanced Trainees (not Provisional Fellows) who are not currently part of the Victorian Rotational Programs (Eastern, Northwestern and Monash).

Information stored from submission of this form will act as a repository that can be accessed by accredited departments in Victoria.

By completing and submitting the form, trainees are consenting for the details in the form, the attached Curriculum Vitae and the referee reports to be available to designated members of accredited training departments who may contact the trainee via the contact details provided if training positions are available.

Submission of the form is not an application. Consent for this to be an application to any particular training program or clinical placement outside of a training program will be sought before any application is progressed and may require a separate application.
