

## Coffs Harbour Health Campus Specialist Anaesthetist

Woven between the mountains and the sea, the Coffs Coast is a breath-taking tapestry of colour, encompassing quaint villages, national parks, marine reserves, islands, mountain escarpments and miles of sandy beaches. Located half way between Sydney and Brisbane and with daily flights to both, Coffs Harbour is the region's hub, surrounded by the delightful seaside and hinterland communities of Bellingen, Dorrigo, Sawtell, Nambucca, Coramba and Woolgoolga. Walking secluded beaches, rocky headlands and the nearby hinterland as well as bike riding, four-wheel driving, fishing, diving, whale watching and surfing are all popular activities for those living and working on the Coffs Coast.

We are a 250 bed acute regional hospital with planning well underway for the announced \$194 million expansion of our campus. We are looking for motivated Specialist Anaesthetists or Provisional Fellows within 6 months of obtaining Fellowship who have a desire to work within our enthusiastic team to provide outstanding clinical care to our patients. You will be expected to provide a full range of Anaesthetic services, to participate in the On Call roster and to support the education and development of our Anaesthetic Registrars, Junior Medical Officers, Medical Students, Nursing and Allied Health staff. You will need to be an Australian Citizen or Permanent Resident with appropriate AHPRA registration as a Specialist Anaesthetist (or eligibility for same). An interest in Acute Pain management, Research, Obstetrics and/or Trauma would be advantageous.

Only applications provided through the [iworkfor.nsw.gov.au](https://iworkfor.nsw.gov.au) website will be considered.
