Recognition of suitability - can't intubate can't oxygenate

CPD

Application for recognition of suitability as an emergency response activity in the ANZCA CPD program

1. CONTACT INFORMATION

Are you the facilitator of this course / workshop? Yes* No

*If yes, continue to section 2.

Are you applying as a participant? Yes No

Family name: _____ First name: _____
 Email: _____ Phone:

Country	Area	Local
---------	------	-------

 Street address: _____
 Suburb/City: _____ State: _____ Postcode: _____ Country: _____

2. FACILITATOR / INSTRUCTOR DETAILS

A. The "Clinical Lead" (the medical officer nominated by each department/group to oversee the provision of the CICO education sessions conducted by that provider) is a consultant anaesthetist or intensivist Yes No

Family name: _____ First name: _____
 Position: _____ Qualifications: _____
 Email: _____ Phone:

Country	Area	Local
---------	------	-------

B. The "Lead Facilitator" (the doctor who oversees the conduct of an individual CICO education session) is at the level of ATY2 or higher Yes No

Family name: _____ First name: _____

C. The course "Instructors" are doctors with relevant anaesthesia skills Yes No

Family name: _____ First name: _____

3. INSTITUTION / COURSE PROVIDER DETAILS (THIS WILL BE PUBLISHED ON THE ANZCA WEBSITE)

Name of institution / private practice: _____
 Department: _____
 Street address: _____
 Suburb/City: _____ State: _____ Postcode: _____ Country: _____

4. SESSION INFORMATION

Session title: _____
 This is a once-off occurrence Start:

Day	Month	Year
-----	-------	------

 End:

Day	Month	Year
-----	-------	------

 This is an ongoing session Starting from:

Day	Month	Year
-----	-------	------

I acknowledge that if there are any changes to the course content or duration, I will need to reapply for recognition of suitability.

Signature: _____

Date: | Day | Month | Year |

If applicable, which ANZCA event is this session a part of? _____

LEARNING OBJECTIVES			
As a minimum, education sessions must provide the opportunity for participants to meet the learning objectives listed below. Objectives marked with an asterisk (*) require participants to actively engage in hands-on activities to practice this skill during the session. Please indicate that participants will be able to:			
1	Apply criteria to recognise when a can't intubate, can't oxygenate (CICO) situation has arisen.	Yes	No
2*	Communicate clearly to others that a CICO situation exists.	Yes	No
3	Explain the steps and decision-making points in one of the recognised difficult airway algorithms that addresses CICO. Refer to list of algorithms in ANZCA CPD CICO standard.	Yes	No
4*	Be fluent with equipment and procedures relevant to the preferred emergency algorithm for infraglottic rescue.	Yes	No
5*	Direct/team-lead an emergency response for CICO including the following steps.	Yes	No
	a. Clearly explain supraglottic airway rescue strategies (technical expertise is assumed).	Yes	No
	b. Transition to CICO.	Yes	No
	i. Anticipate and mobilise resources for imminent infraglottic rescue.	Yes	No
	ii. Recognise and declare CICO as per definition in the ANZCA CPD CICO standard.	Yes	No
	c. Infraglottic airway rescue.	Yes	No
	i. Implement the chosen emergency algorithm.	Yes	No
	ii. Continue supraglottic airway rescue.	Yes	No

STRUCTURE OF EDUCATION SESSION - The education session is required to:				
1	Provide pre-course reading that refers to the selected CICO algorithm used in the session and provides relevant foundation knowledge of the session content.	Yes	No	
2	Be deliverable:	<input type="checkbox"/> as a continuous session. <input type="checkbox"/> in parts.		
3	Provide hand-on activities, which include scenario-based rehearsal to achieve objectives marked with an asterisk (*) listed in the learning objectives. A minimum of 90 minutes of scenario-based practice.	Yes	No	
4	Be conducted by a lead facilitator and provide at least one instructor per four participants. Facilitators need to observe each participant while they are working through scenarios and provide verbal feedback to ensure they are achieving the objectives of the session.	Yes	No	
5	Utilise the following equipment:	Models of the neck allowing practice of infraglottic airway placement.	Yes	No
		Oxygen for oxygen delivery for infraglottic rescue.	Yes	No
		Equipment relevant to preferred emergency algorithms.	Yes	No

SESSION MATERIALS - Session materials must include the following:			
1	Session objectives.	Yes	No
2	Session outline.	Yes	No
3	Facilitators' guide (including equipment list, scenario outlines).	Yes	No
