PRESENTING HAEMOGLOBIN _______________ g/L
Is the patient anaemic? Yes / No
If yes:
Are B12, folate or iron studies* available? Yes / No
If yes:
Is the patient deficient in B12, folate or iron? Yes / No
If yes:
Has treatment been instigated? Yes / No
If yes: (select one or more)
- Oral iron
- IV iron
- oral folate
- B12 injection
Has the treatment instigated been adequate? (pre-operative haemoglobin in normal range) Yes / No
If no, what was the cause of the failure? (select one or more)
- Inappropriate treatment instigated, surgery within 6 weeks, inadequate time for effective response (e.g. oral iron rather than IV iron)
- Appropriate treatment instigated but inadequate response
- Oral iron prescribed but inappropriate dose (<65mg/day)
- Medication not taken by patient
- Medication taken but not tolerated (in the case of oral iron IV is the appropriate treatment)
- Intravenous iron appropriate but not provided
- Other (provide detail)

* investigations used in the institution to diagnose iron deficiency.
