

ANZCA and FPM CPD Program

Peer review of practice (procedures in pain medicine) - guideline

Paired activity

Category 1
Practice evaluation
Reviewing
performance

Purpose

This guideline assists specialist pain medicine physicians who undertake procedures and reviewers complete the peer review of practice activity.

Activity description

The purpose of peer review of practice is to consider how you (the participant) may improve your pain medicine practice in procedures by inviting a colleague to observe you managing a procedure list. This reviewer uses a structured form as the basis for a feedback discussion regarding approaches to practice. The form accords with [PS11\(PM\): Procedures in pain medicine clinical care standard](#) (the clinical care standard). It is anticipated that this will be a mutually beneficial learning experience. Fellows should keep in mind that the purpose of this activity is professional development and that focus areas should be aspects of practice for which feedback would be most valuable.

How to complete this activity

Steps

Time period	Steps	Complete
Prior to the review	Invite a trusted colleague who is also a registered specialist pain medicine physician (SPMP, the reviewer) to conduct a peer review of your practice. Organise a mutually convenient date and time (minimum of half a day) for your colleague to observe you, including a list representative of your everyday practice. It is recommended that you select a list that includes a variety of simple and complex pain procedures.	
	Complete the relevant sections of the Peer review of practice agreement and CPD verification form and provide it to the reviewer to sign. The reviewer should complete the remainder of the form, sign and return to you. This agreement includes responsibilities of the participant and the reviewer and issues regarding liability.	
	Provide your reviewer with a copy of Practical guidance for CPD feedback conversations .	

Time period	Steps	Complete
	<p>With the reviewer, go over the observation form and determine the focus areas of the peer review.</p> <p>The observation form includes the ten categories aligned to the clinical care standard:</p> <ul style="list-style-type: none"> • Triage and clinical assessment • Patient preparation • Safe and sufficient facilities • Sedation and anaesthesia • Imaging equipment and practice • Proceduralist • Procedural performance • Documentation and communication • Outcome assessment • Post-procedure care <p>Keep in mind the purpose of this activity is professional development; focus areas should be aspects of practice for which feedback would be most valuable.</p> <p>While you can highlight particular aspects of practice within the ten categories, a minimum of one item in each category should be identified and discussed. The reviewer may wish to explore other issues that arise during their observation and is encouraged to make notes accordingly.</p>	
	<p>Inform the theatre team and other relevant staff that a second SPMP will be present for CPD purposes.</p> <p>Request consent from the patient(s).</p>	
The review and feedback	<p>The reviewer uses the observation form to document observed examples of the participant's practice.</p> <ul style="list-style-type: none"> • Using an electronic version is recommended, as the cells expand to incorporate detailed notes. • There is no scale to make a judgement on the participant's performance. Rather, each item is a prompt for the reviewer to initiate a conversation with the participant about an aspect of practice and their underlying reasoning for the method they have chosen to adopt. 	
	<p><i>During the observation the role of the reviewer is only to observe the participant. They should not intervene, unless requested to do so or in the interest of patient safety.</i></p>	
	<p>Immediately after finishing their observation, the reviewer should take some time to consider their notes and how they will approach the discussion with the participant.</p> <p>The reviewer may volunteer examples from their own practice and engage the participant in a discussion of the advantages and disadvantages of each.</p> <p>A discussion of the management of unexpected events or emergencies that may occur in relation to the cases observed, and what the participant may have done in the event of alternate scenarios, may also be useful.</p>	

Time period	Steps	Complete
	The discussion should occur on the same day as the observation period, ideally within an hour of completion of the review. The participant and reviewer should meet in a private space for a minimum of 20-30 minutes.	
	It is suggested that the reviewer uses the approach outlined in Practical guidance for CPD feedback conversations . The Procedures Endorsement Program Curriculum provides practical guidance on competencies expected of specialist pain medicine specialists who perform procedures.	
	At the end of the feedback discussion, the reviewer should: <ul style="list-style-type: none"> • prompt the participant to consider two or three elements they might change or improve as a result of reflecting on their practice. • ask the participant what CPD activities they plan to participate in over the next 12 months • suggest additional or alternate activities which support any learning needs highlighted in the peer review. 	

Receiving feedback: for the participant

CPD activities are intended to promote supportive conversations that assist you to reflect and advance your practice. Engaging in a feedback conversation may on occasions challenge you and raise uncomfortable thoughts and feelings. If this occurs consider seeking out a trusted colleague or friend for support. Confidential wellbeing support is freely available through the college, details can be found on the [website](#).

Notifiable conduct and fitness to practice: responsibilities of the reviewer

In Australia, a registered health practitioner is required to report another registered health practitioner if the first person forms a reasonable belief, in the course of his or her practice, that notifiable conduct has occurred. For more information on what constitutes notifiable conduct, refer to the [Australian Health Practitioner Regulation Agency](#) (AHPRA).

Participants in New Zealand should be aware that, under the Health Practitioners Competence Assurance Act 2003, it is mandatory for any doctor who has reason to believe a registered doctor is unfit to practice medicine because of a mental or physical condition, to notify the Medical Council of New Zealand. Such conditions include alcohol or drug dependence, other psychiatric disorders, a temporary stress reaction, an infection with a transmissible disease, declining competence due to age-related loss or motor skills or to the early stages of dementia, and certain illnesses and injuries.

Using a different tool

If you choose to use a different tool for the peer review of practice, ensure it was developed to for the purposes of peer review of a medical practitioner and is relevant to your scope of practice.
