

CPD handbook appendix 4DHM

Multi-source feedback (diving and hyperbaric medicine practice) - form

A voluntary, quality improvement activity

Thanks for agreeing to be a part of this process. The hyperbaric physician who has given you this form is participating in this voluntary activity as part of the Australian and New Zealand College of Anaesthetist (ANZCA) and Faculty of Pain Medicine (FPM) Continuing Professional Development (CPD) Program.

The purpose of the multi-source feedback is to guide improvement of hyperbaric physicians by asking colleagues and co-workers to identify attributes that can be developed further and/or addressed if necessary.

Feedback responses have been requested from others, including: Hyperbaric physicians, hyperbaric nurses/technicians and hyperbaric trainees (if applicable). Other members of the team you work with also may have been approached, for example: administrative staff.

Please provide honest feedback

Please provide honest feedback on the form, by indicating whether you observe the participant never, sometimes, usually or consistently demonstrating the attributes listed on the left-hand side of the form. You are encouraged to indicate if you have not observed any particular item, if this is the case please mark the "not observed" box.

Your feedback is confidential

Please give the completed form to the facilitator listed below.

The facilitator will collate the results from individual forms on to a summary sheet and provide de-identified feedback to the hyperbaric physician based on this summary. The hyperbaric physician does not view individual forms. The facilitator will destroy them after responses are included in a summary document.

Facilitator: _____

Multi-source Feedback (MsF) form

Name of hyperbaric physician: _____

Your role: _____

	Not observed	Never	Sometimes	Usually	Consistently
