

## CPD handbook appendix 7A

### Peer review of practice (anaesthesia practice) - observation form

Date: \_\_\_\_\_ Location: \_\_\_\_\_

Type of surgical list: \_\_\_\_\_

| Category of practice                                 | Observations | Outcome of discussion |
|--|--------------|-----------------------|
| <b>Patient management</b>                            |              |                       |
| Preoperative assessment                              |              |                       |
| Additional investigations/interventions              |              |                       |
| Selection of anaesthetic technique                   |              |                       |
| Case preparation                                     |              |                       |
| Use of monitoring devices                            |              |                       |
| Clinical and situational awareness                   |              |                       |
| Response to change in patient status                 |              |                       |
| Postoperative management plan                        |              |                       |
| Ethical care of the patient                          |              |                       |
| <b>Communication</b>                                 |              |                       |
| Management of consent process                        |              |                       |
| Relationship with patients and their families/carers |              |                       |

|  |  |  |
|--|--|--|
| Negotiating patient concerns, values and wishes  |  |  |
| Communication with anaesthetic assistant   |  |  |
| Communication with theatre team  |  |  |
| <b>Teamwork/collaboration</b>  |  |  |
| Plan of care agreed with surgeon   |  |  |
| Communication of anaesthetic management plan to all team members                                       |  |  |
| Negotiation with other staff to optimise patient care, as required                                     |  |  |
| Cooperation with team and requesting assistance from others  |  |  |
| Clear delegation of tasks  |  |  |
| Responsiveness to questions or suggestions   |  |  |
| <b>List management</b>   |  |  |
| Case allocation and prioritisation   |  |  |
| Operating list organisation and efficiency   |  |  |
| Management of theatre resources and cost/utility implications  |  |  |
| Vigilance  |  |  |
| Handover of patient care   |  |  |
| Adherence to agreed standards and guidelines, including participation in WHO Surgical Safety Checklist |  |  |
| Risk minimisation (practices to reduce patient harm)   |  |  |
